## Commercially focused seedstock producers

The Bruan Poll Dorset stud was founded in 1984 on Wandin Woods bloodlines with the aim of breeding rams with good loin length-width and good muscling.

Stud sires are selected on performance data, conformation and structural soundness. We use sires that have been genomic tested. Genomic testing gives us data on the hard to measure traits such as eating quality and lean meat yield. Sires are chosen carefully to enable us to offer the best genetic packages to our clients.

Bruan is a member of Meat Elite Australia- a group of Poll Dorset breeders who work together for excellence through their breeding programs based on accurate data and structural soundness. By sharing genetics from objectively measured superior animals, Meat Elite sheep consistently out perform the average terminal sire indexes.

Our aim is to produce high performance genetics with high growth and positive muscle. We believe it is important to have positive muscle to help the lambs finish at a younger age and also help the lean meat yield for those marketing over the hooks. Genomic DNA testing for meat eating quality and meat yield, prior to sire selection is a high priority.

Terminal sires 2013 average	0.32	11.7	-0.6	1.1	173.20
Bruan Poll Dorsets sale ram average	0.46	13.0	-0.5	2.0	189.52

**NOTE:** Shaded areas represent rams identified as trait leaders that are in the top 10% of all terminal sires of the 2013 drop rams in Australia.

The Lambplan run date is Aug.15 2014

**Rams needing to be stud registered have a reserve of \$2000  
Bruan retains semen rights in all stud rams**

# NOTES

# NOTES

In buying a BRUAN Poll Dorset ram/s you have chosen wisely. Into it have gone years of thought, research and improvements.

You will find, as many other owners all across Australia, that you have the best genetics on offer.

You have purchased a dependable animal, but only by proper care can you expect to receive performance and long service. BRUAN Poll Dorsets can instruct you on the general maintenance as it is important you get the best performance, and we will be glad to answer any questions you may have.

## Comparing sire potential

Are you buying the right rams for your production system?

This is the question, lamb producers should be asking themselves. The rams you buy today will affect the lambs you produce over the next four to five years.

When selecting rams, identify and seek genetics that will help you reach your breeding objective. Also consider other factors of economic importance, which are influenced by genetics such as growth, meat quality and disease resistance.

A percentile band table is a useful tool to assist the interpretation and application of Australian Sheep Breeding Values (ASBVs) when selecting rams. The table shows the spread and breakdown of ASBVs for each trait using percentiles and shows how well an animal performs relative to the current year drop.

By using the percentile table, it can easily be determined if an animal is above average or if it is in the top 10, 20, 30% etc. of rams for any trait of interest.

To use a percentile band table, go to the column heading for the trait in question. Go down to the ASBV range of the ram you are interested in, then project across to the left-hand row headings to see where the animal ranks.

For example, a ram with a post weaning weight (Pwwt) of 13.6 ranks in the top 20% for terminal sires born in 2013.

Percentile reports are available on the LAMBPLAN website
